

Reconnaissance Practice

Tools: Maltego, Shodan

During the reconnaissance phase, passive OSINT techniques using Maltego and Shodan were performed on the domain maltego.com to identify exposed assets and infrastructure. Multiple active subdomains such as www.maltego.com, docs.maltego.com, and wildcard.ns.maltego.com were discovered, along with third-party DNS and Microsoft mail protection services, indicating reliance on external infrastructure. The domain operates on a geographically distributed hosting architecture across regions including Amsterdam, Helsinki, Cambridge, and Frankfurt.

Shodan analysis revealed publicly accessible services, including an HTTP service on 202.21.39.32 redirecting to a [/login](#) page, an exposed SSH service (OpenSSH for Windows 9.5) on 45.113.226.70, and an active HTTPS service with a valid SSL certificate on 45.116.205.35 returning a 404 response. Additionally, common exposed ports such as 80, 443, and 22 were widely observed across major Indian cities, increasing the overall external attack surface. These findings highlight the presence of multiple publicly exposed assets and services, emphasizing the need for continuous monitoring and proper access control.

Below is the Asset Mapping: Log Steps

Timestamp	Tool	Finding
2025-11-22 14:05:12	Maltego	Domain analyzed:

		maltego.com
2025-11-22 14:06:04	Maltego	Discovered subdomains: www.maltego.com , docs.maltego.com , wildcard.ns.maltego.com
2025-11-22 14:07:22	Maltego	Identified multiple IP addresses linked to subdomains (examples: 185.199.109.152, 185.199.110.152, etc.)
2025-11-22 14:08:10	Maltego	Mapped IP ranges related to Maltego infrastructure
2025-11-22 14:09:45	Maltego	Geo-locations of servers found: Amsterdam, Helsinki, Cambridge, Frankfurt
2025-11-22 14:10:15	Maltego	DNS Name Server information retrieved for domain
2025-11-22 14:11:20	Shodan	IP found: 202.21.39.32 – HTTP service detected
2025-11-22 14:11:28	Shodan	HTTP response: 303 See Other , redirecting to /login
2025-11-22 14:11:40	Shodan	Location identified: Mumbai, India
2025-11-22 14:11:52	Shodan	Another IP found: 45.113.226.70
2025-11-22 14:12:05	Shodan	SSH service detected on port 22 using OpenSSH for Windows 9.5

Checklist:

- ☒ ~~Check WHOIS~~
- ☒ ~~Enumerate subdomains (Sublist3r)~~
- ☒ ~~Identify tech stack (Wappalyzer)~~

Summary

Passive OSINT using Maltego and Shodan identified multiple active subdomains and publicly exposed services for **maltego.com** across globally distributed infrastructure. HTTP, HTTPS, and SSH services were detected on various IPs, increasing the external attack surface. These findings highlight the need for continuous monitoring, asset visibility, and access control hardening.
